

# Plants, Genes, and Agriculture

## Sustainability through Biotechnology

Edited by Maarten J. Chrispeels (UC San Diego) and Paul Gepts (UC Davis)

Sinauer Associated/ Oxford University Press

### Table of Contents:

Chapter 1. The Human Population and Its Food Supply in the 21st Century, Maarten J. Chrispeels and Hanya E. Chrispeels

Chapter 2. A Changing Global Food System: One Hundred Centuries of Agriculture, H. Maelor Davies and Paul Gepts

Chapter 3. Plants in Human Nutrition, Diet, and Health, Maarten J. Chrispeels

Chapter 4. Genes, Genomics, and Molecular Biology: The Basis of Modern Crop Improvement, Kranthi K. Mandadi and T. Erik Mirkov

Chapter 5. Growth and Development: From Fertilized Egg Cell to Flowering Plant, Maarten J. Chrispeels

Chapter 6. Converting Solar Energy into Crop Production, Donald R. Ort, Rebecca A. Slattery, and Stephen P. Long

Chapter 7. The Domestication of Our Food Crops, Paul Gepts

Chapter 8. From Classical Plant Breeding to Molecular Crop Improvement, Paul Gepts and Todd Pfeiffer

Chapter 9. Plant Propagation by Seeds and Vegetative Processes, Kent J. Bradford and Maarten J. Chrispeels

Chapter 10. Innovations in Agriculture: How Farm Technologies Are Developed and How They Reach Farmers, H. Maelor Davies

Chapter 11. Soil Ecosystems, Plant Nutrition, and Nutrient Cycling, Eric M. Engstrom

Chapter 12. Biotic Challenges: Weeds, Patrick J. Tranel

Chapter 13. Plant Diseases and Strategies for Their Control, Andrew F. Bent

Chapter 14. Biotic Challenges: Pests, Georg Jander

Chapter 15. Abiotic Stresses and How They Affect Crop Yield, Maarten J. Chrispeels

Chapter 16. Introduced Traits That Benefit Farmers and Industry, Maarten J. Chrispeels and Eliot M. Herman

Chapter 17. Introduced Traits That Benefit the Consumer, Maarten J. Chrispeels and Eliot M. Herman

Chapter 18. Food Safety: Are Foods Made from GE Crops Safe to Eat? David Tribe

Chapter 19. Challenges and Solutions for Subsistence Farmers, Manish N. Raizada

Chapter 20. Plants as Chemical Factories, Krutika Bavishi and Birger Lindberg Moller

Chapter 21. Plants as Factories for the Production of Protein Biologics, Qiang Chen

Chapter 22. Sustainable Food Production in the 21st Century, Maarten J. Chrispeels
